

Go here to download OpenOffice

<http://download.openoffice.org/>

You should see this page

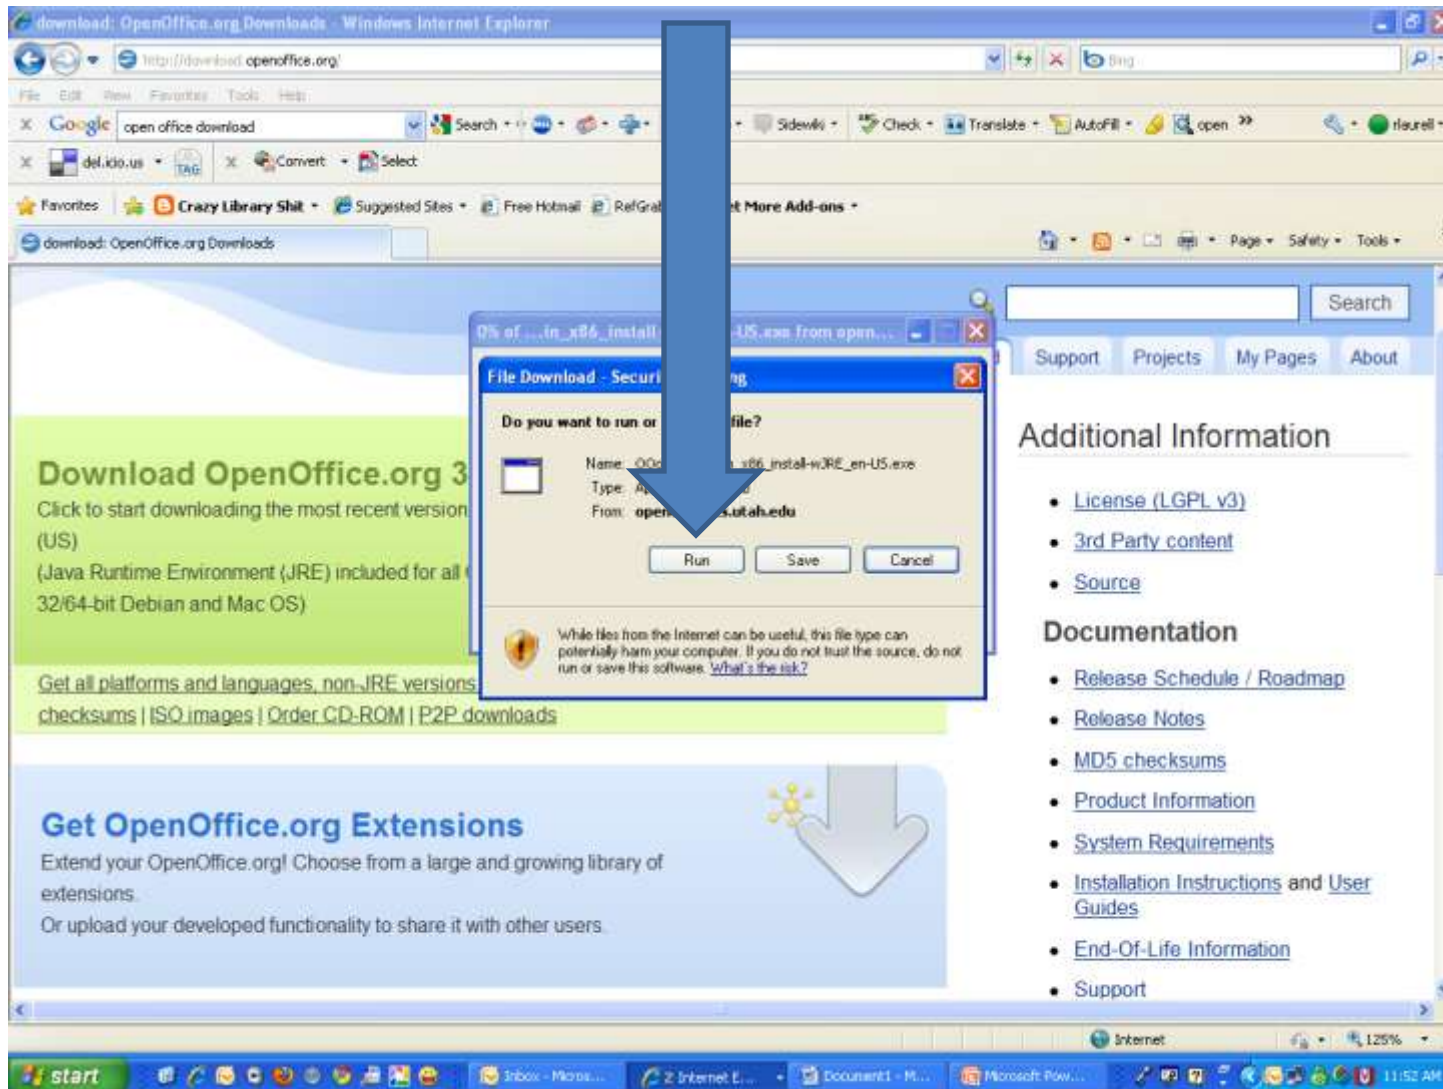

Click on the Green Down Arrow

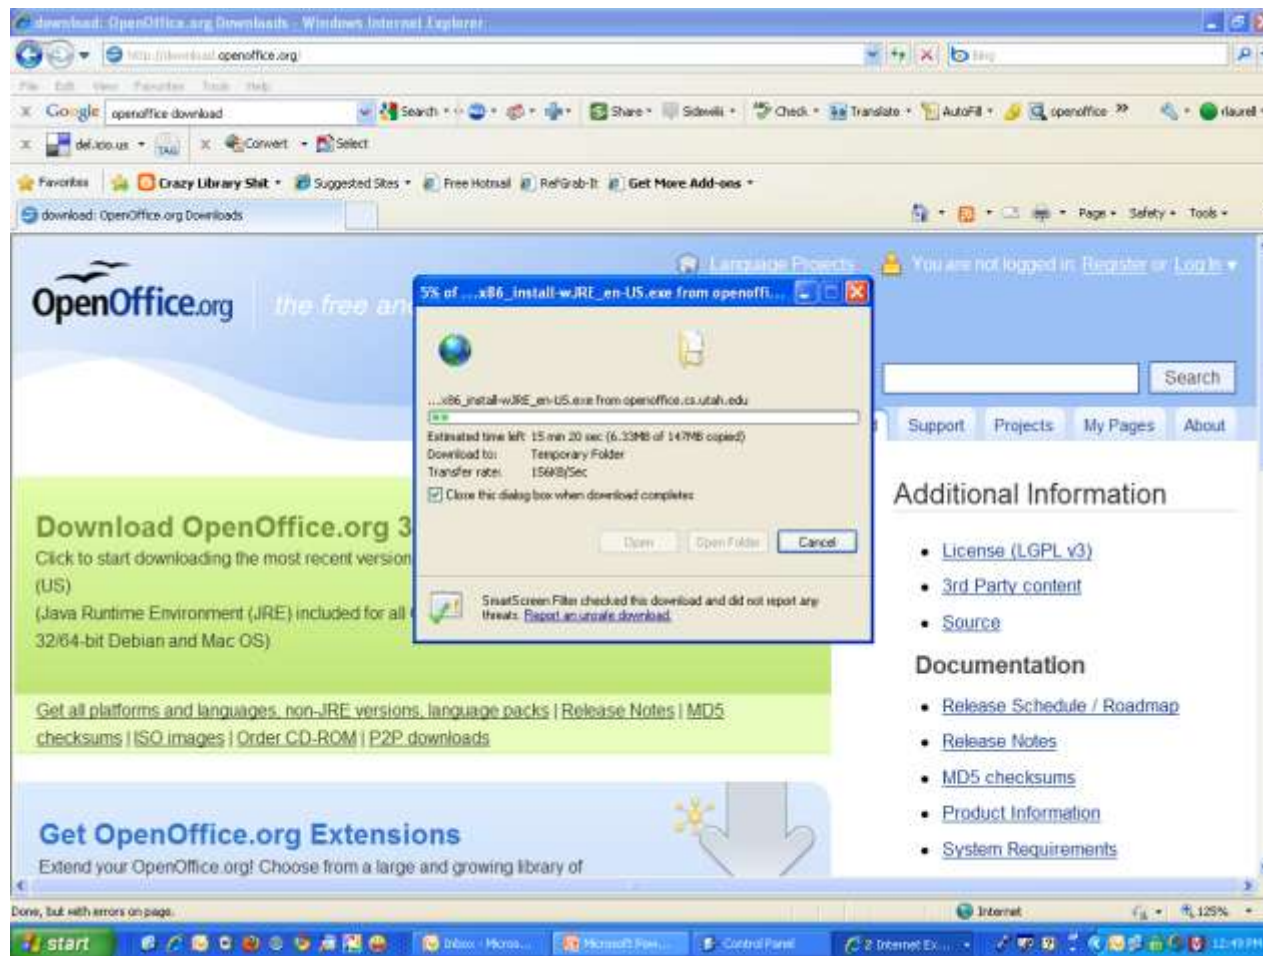

You will see a pop up box like this

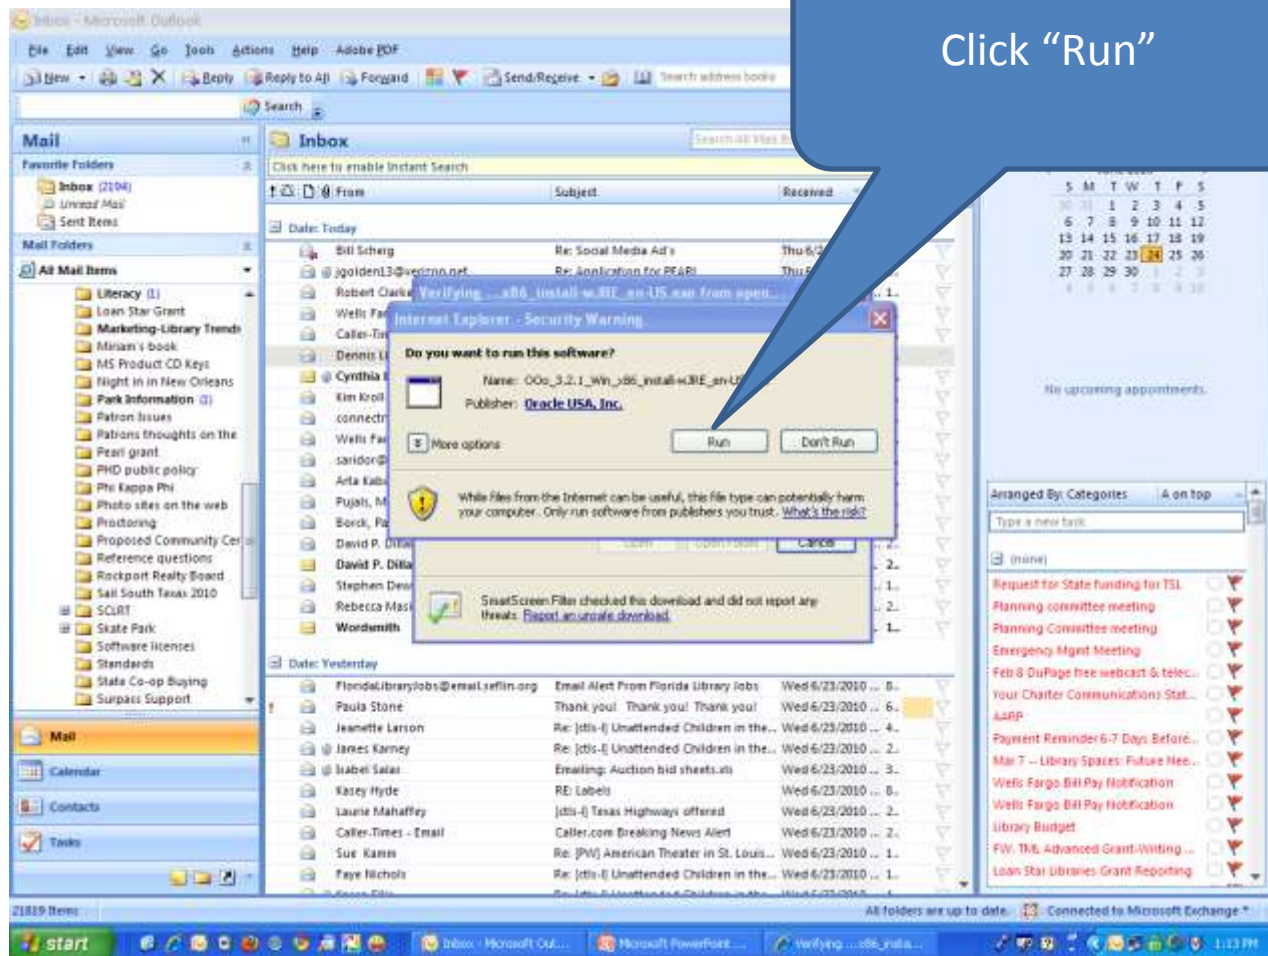

Click on “Run”

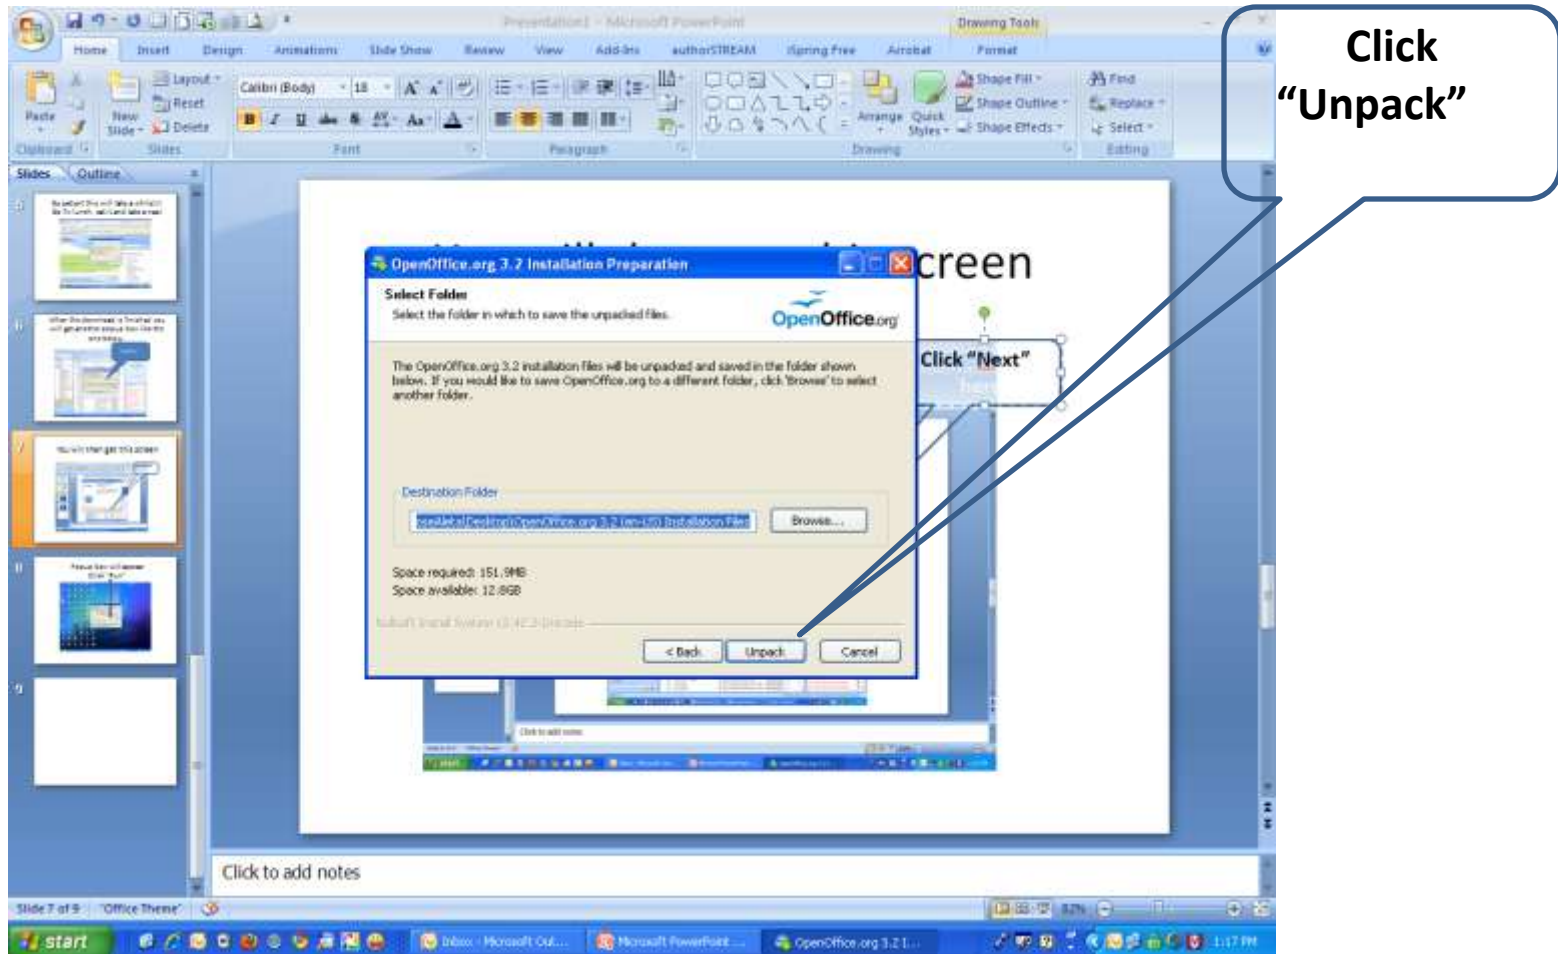

Be patient this will take a while!!!!
Go fix lunch, eat it and take a nap!

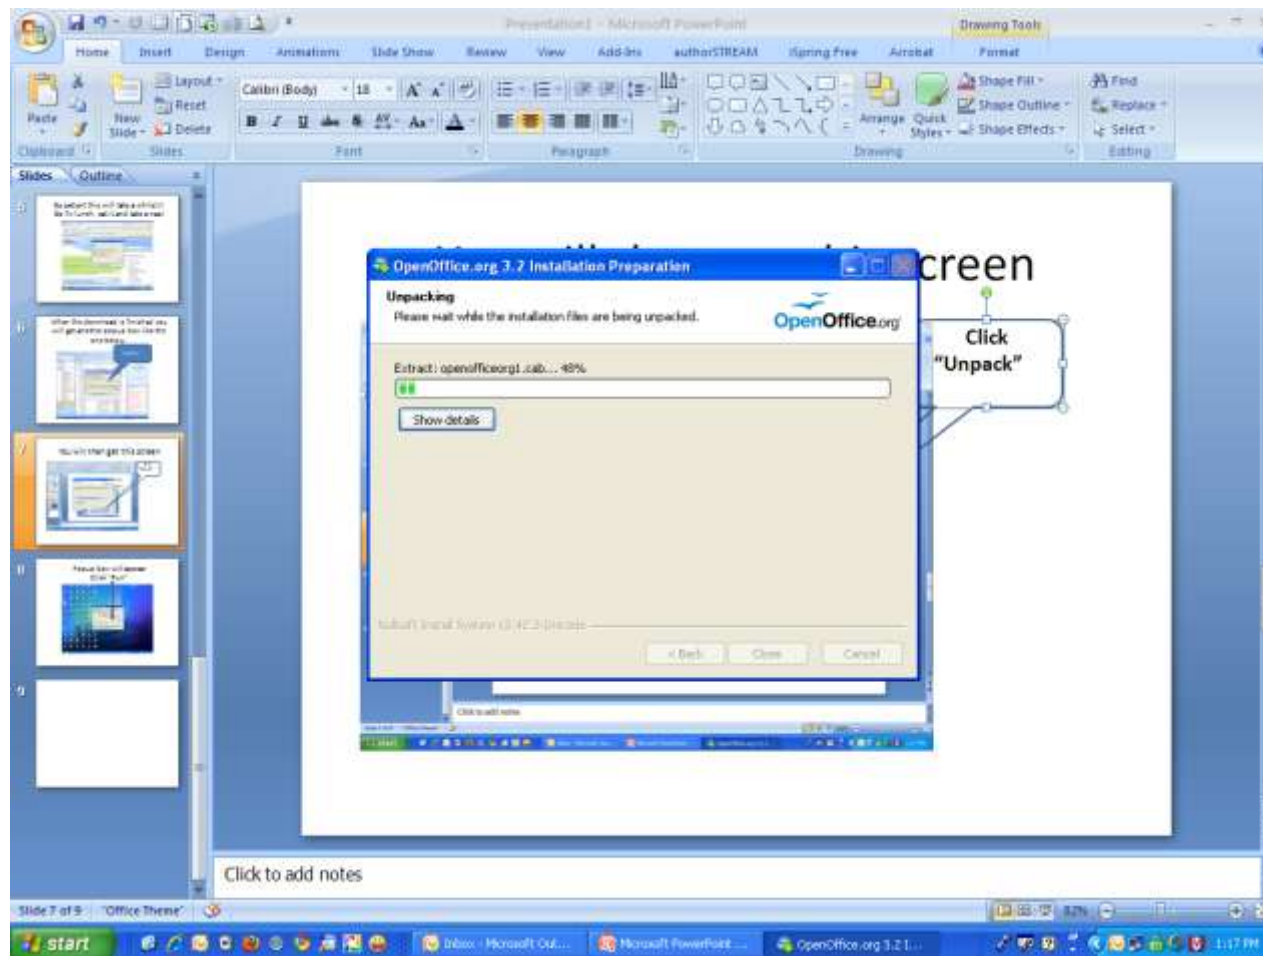

When the download is finished you will get another popup box like the one below.

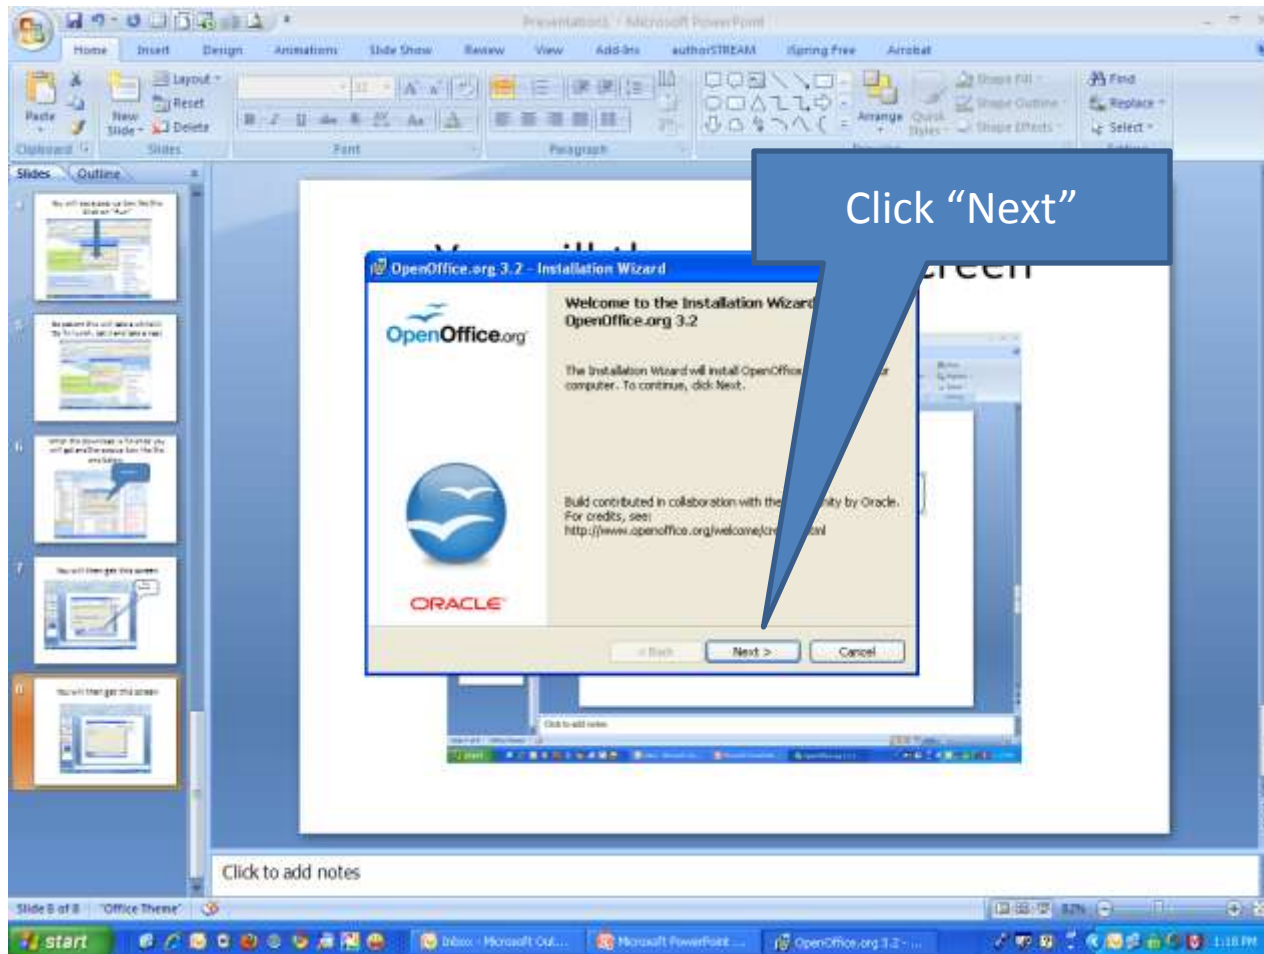

You will then get this screen

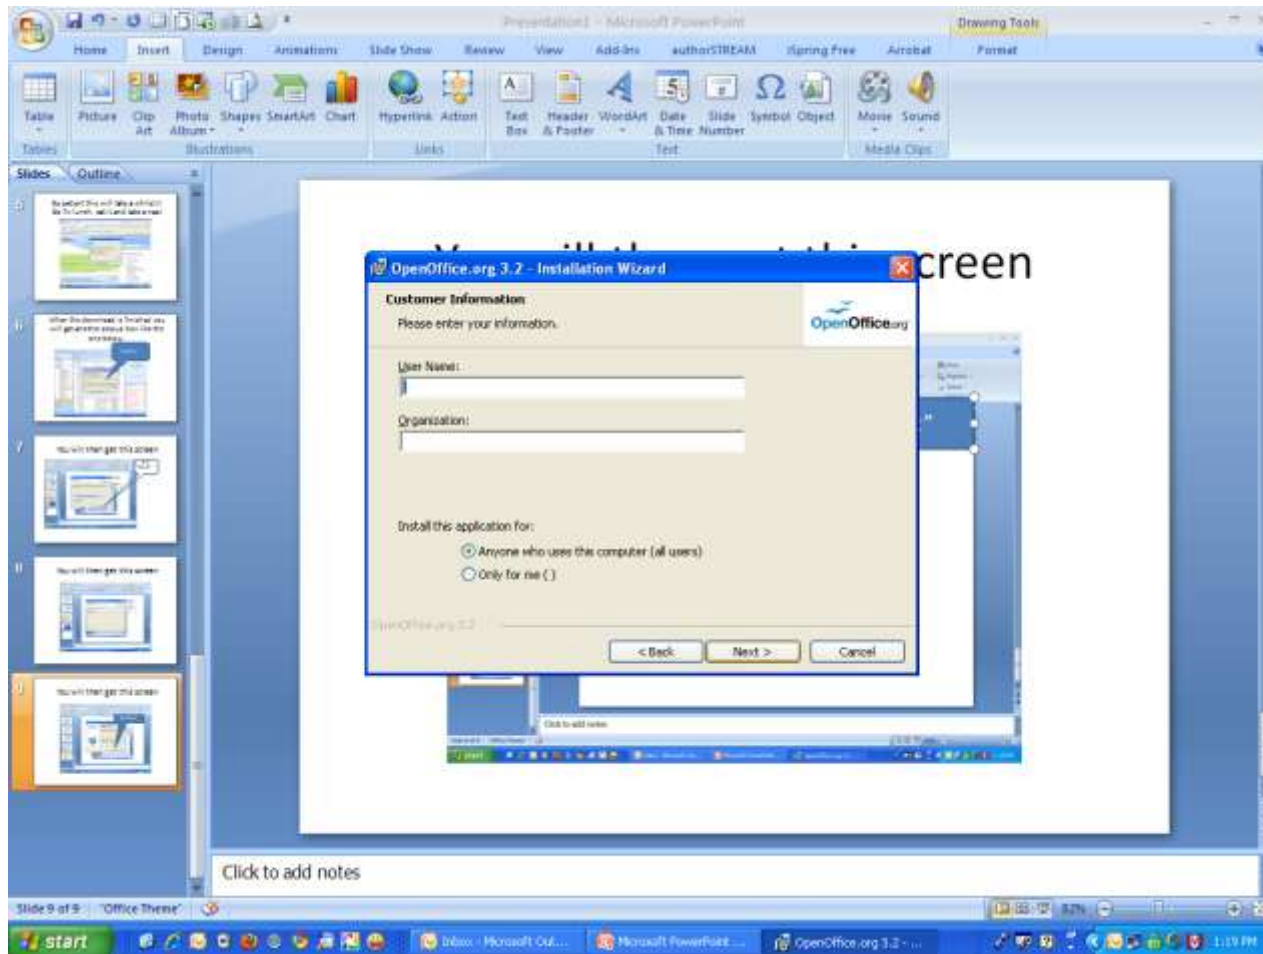

You will then get this screen

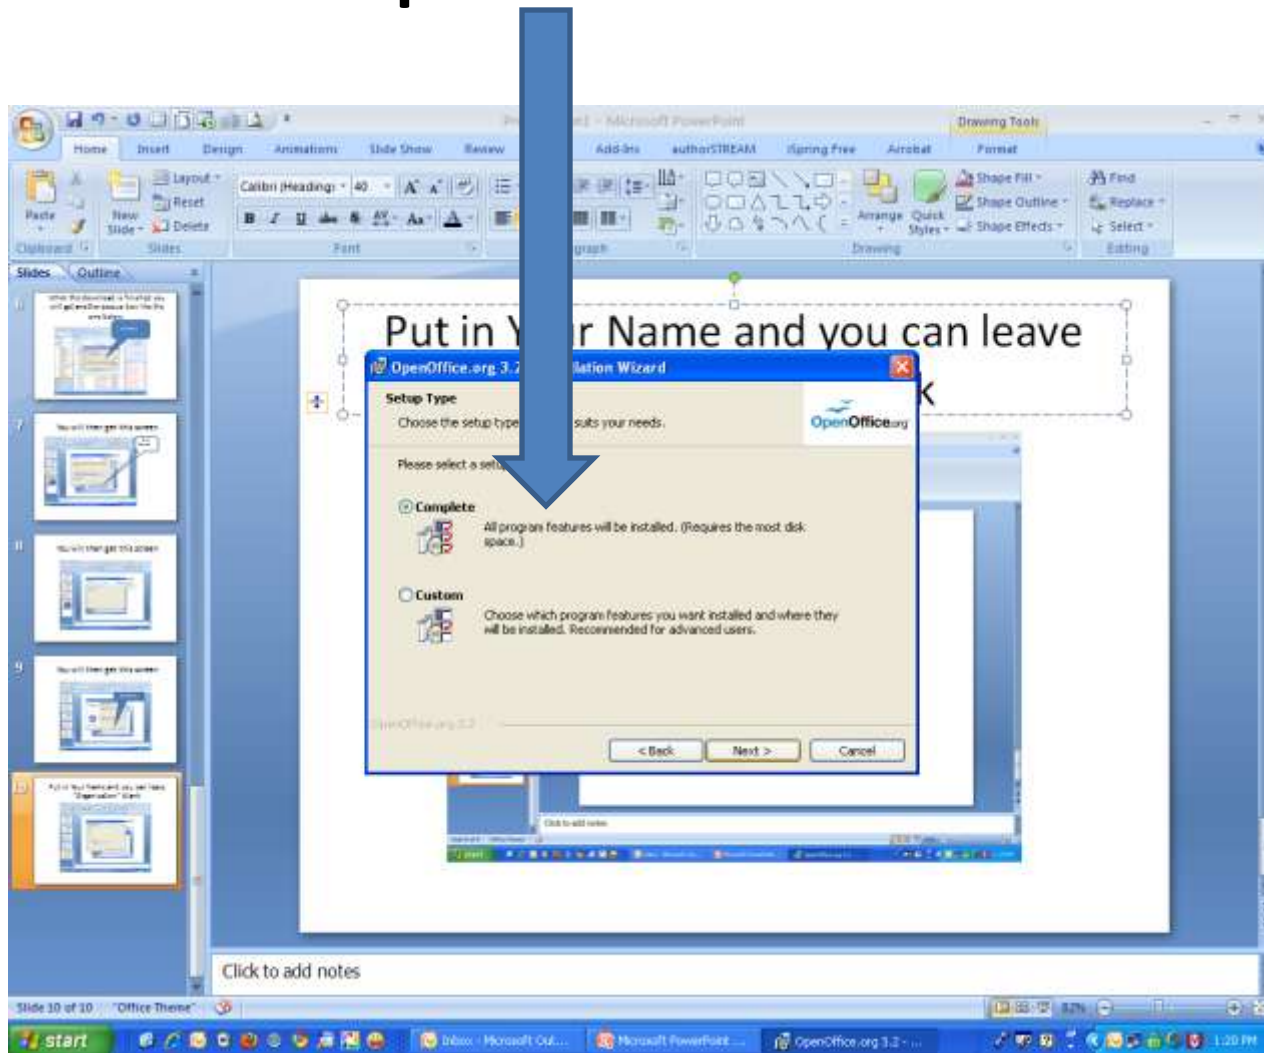

You will then get this screen

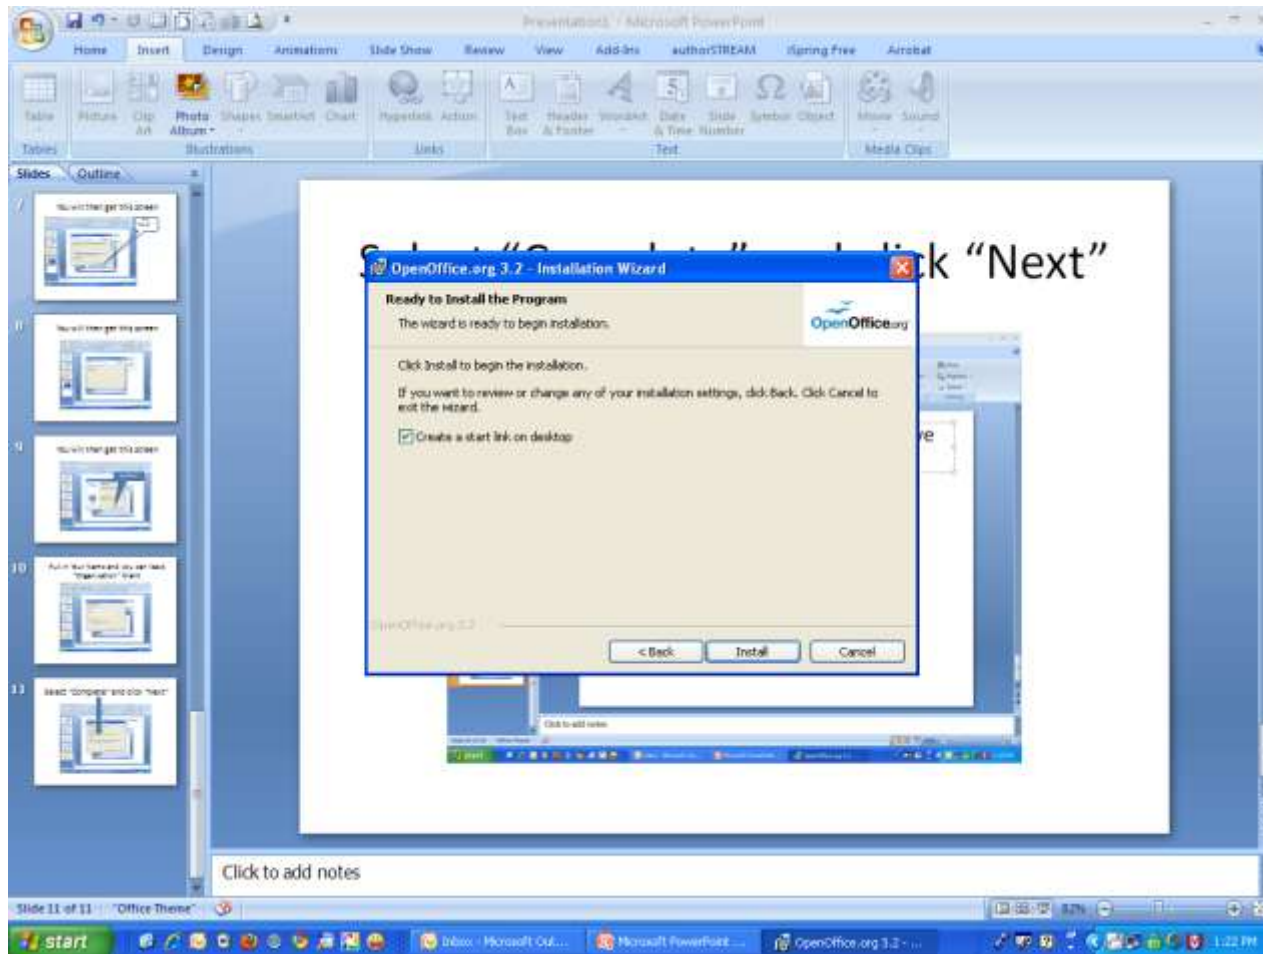

Put in Your Name and you can leave “Organization” blank

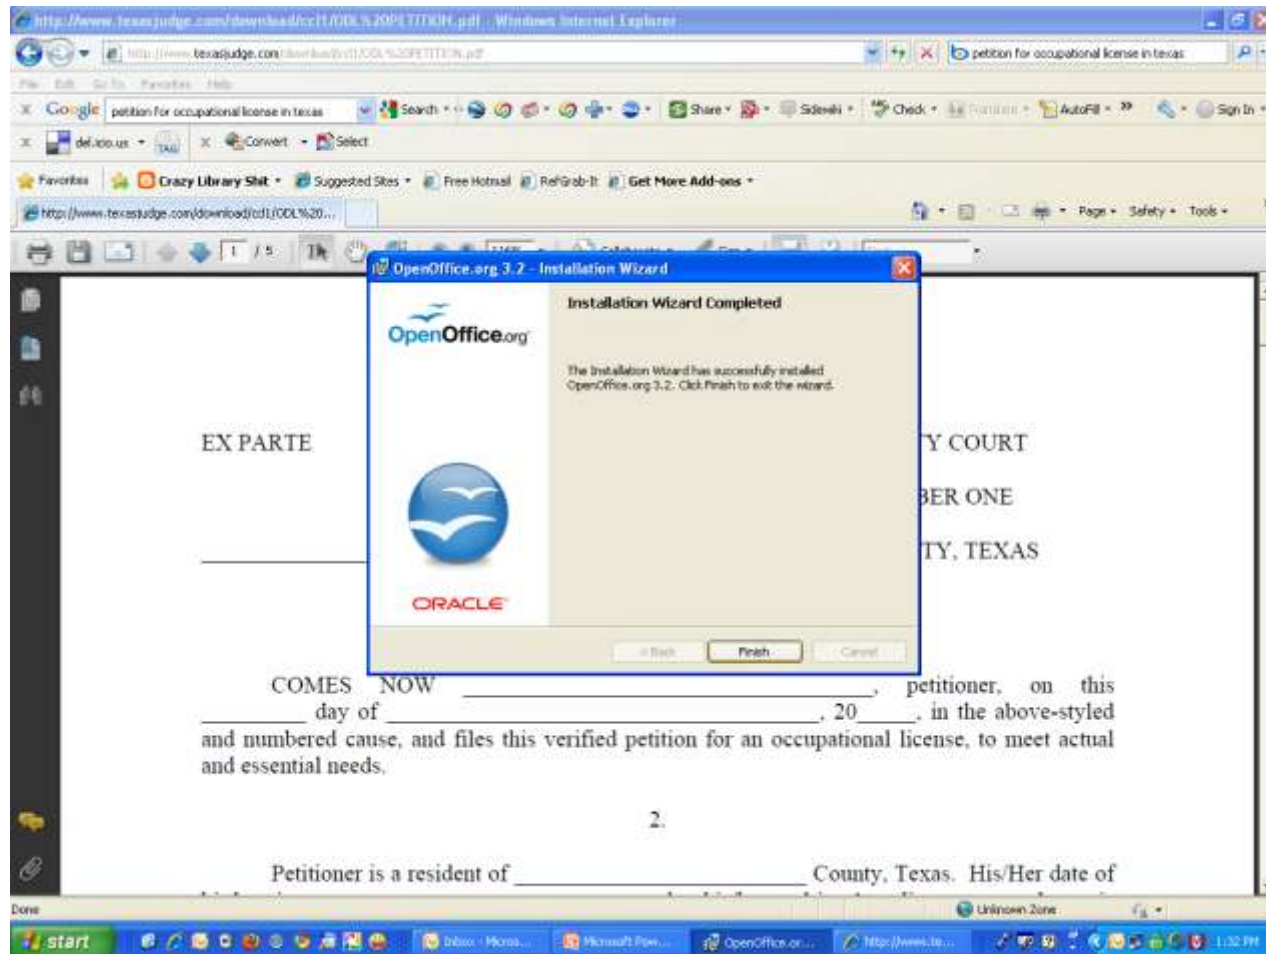

Select “Complete” and click “Next”

Leave “Create a start link on desktop” selected & click “Install”

When the installation is complete you will get this screen. Click “Finish”

You can now begin to use OpenOffice, which you will find under Start → “All Programs”
